

FC AFC Wight's The Dark Side "Vader"

Stud Agreement

The undersigned parties agree to the following terms and conditions in regard to the breeding identified below. **Only after this agreement has been signed by both parties will the breeding take place.**

Stud Owner Information:

Tracy Wight
2027 County Road 122
Gainesville, TX 76240
Tracygwight@yahoo.com

Stud Information:

Registered Name: Vader
Call Name: SR81905107
AKC #: 2/14/2014
Date of Birth: Wight's The Dark Side

Bitch Owner(s) Contact Information:

Name(s): _____

Address: _____

Home #: _____ Cell #: _____

Email: _____

Address: _____

Bitch Information:

Registered Name: _____

Call Name: _____ AKC #: _____ Date of Birth: _____

Conditions of Service

1. Prior to the stud service, the bitch owner will provide the following information to the stud owner via text, email, mail, or fax:

- **Negative brucellosis test dated within 14 days of a natural breeding** (only required for natural breeding) This test can take your vet a week or more to get results. Do NOT delay!
- Proof of AKC pedigree
- Proof of normal OFA hip report
- Proof of normal OFA elbow report
- Proof of CNM report – can by via parentage
- Proof of EIC report– can by via parentage
- Proof of board-certified ophthalmologist's CERF report
- Proof of up-to-date shot records with dates: DHLPP: _____, Rabies: _____, Bordetella: _____

2. The stud owner will NOT be liable for injuries that may be sustained by the bitch during the breeding process or while on the stud owner's property.

FC AFC Wight's The Dark Side "Vader"

Stud Agreement

3. The bitch owner agrees to perform progesterone and/or LH testing on the bitch to determine the proper breeding window. Before a natural breeding will be attempted, a current progesterone test that shows a progesterone level higher than a 5.0 will be required. Breeding should then occur 2 days after the level is above a 5.0. The bitch owner will be responsible for any and all medical expenses, including those pertaining to hormone testing and veterinary fees. If a natural breeding cannot be accomplished, and the bitch owner desires to proceed with an AI breeding, the bitch owner agrees to provide a credit card number to the collecting veterinarian to cover any AI costs, and to pay any travel fees incurred to transport the bitch and stud to the AI facility.

You can usually wait to do the first progesterone number on the 8th day of her heat cycle. Please do not stop testing until you've reached a number over 5ng/ml or recommended by your veterinarian.

Understanding when to breed:

<i>Progesterone Results</i>	<i>Action</i>
<i>Below 1.0 ng/ml</i>	No ovarian activity Test every 3 or 4 days
<i>1.0 to 2.0 ng/ml</i>	Rise indicates active ovary Test in 2 to 3 days
<i>2.0 to 4.9 ng/ml</i>	Active ovary Test every 24 hours until you determine 5.0
<i>5.0 – 8.0 ng/ml</i>	OVULATION WAIT 2 more days for the eggs to mature and then breed
<i>6 to 11 ng/ml</i>	BREED in 1 to 2 days
<i>11 to 19 ng/ml</i>	BREED TODAY
<i>OVER 19 ng/ml</i>	BREED IMMEDIATELY if vaginal smear is OK and bitch is still receptive. This is considered LATE.

4. Any or all of the following breeding methods may be used, by agreement of the parties and with payment of all costs and charges for such methods as described below.

A. Natural breeding. The stud fee is \$1,800 for one tie, or \$2,300 for two ties, OR the pick of the litter, at the stud owner's option. You may be allowed a second tie only if the stud's schedule permits. Of this fee, \$500 will be paid at the time of the breeding (the "breeding fee") and is non-refundable. The remainder of the stud fee is due within two weeks after the whelping of a litter of at least three puppies. If fewer than three puppies are whelped, the stud fee will be adjusted to \$600 per puppy. The stud owner will sign the litter registration after receipt of full payment.

It is recommended that the bitch owner has a back-up stud dog available in the event that the stud dog is servicing another bitch, or if the stud dog owner is unavailable, during the breeding window.

If the bitch does not conceive and progesterone testing was done on the first service, one additional service will be provided within the next 12 months, at the bitch owner's option. In such event, the \$500 non-refundable breeding fee previously paid will be applied to the then-existing stud fee due for the additional service.

B. Fresh chilled. The stud fee is \$1,900 for one collection, or \$2,400 for two collections, OR the pick of the litter, at the stud owner's option. You may be allowed a second collection only if the stud's schedule permits. A non-refundable deposit of \$600 of the fee must be received by the stud owner prior to the shipment of fresh chilled semen. The deposit will be applied toward the stud fee.

FC AFC Wight's The Dark Side "Vader"

Stud Agreement

When we are in Gainesville, Texas, Vader can be collected and semen shipped directly to you. This collection kit will need to be ordered and received PRIOR to the collection.

<https://www.innovativecaninereproduction.com/chilled-semen-kits.html>

The owner of the bitch will fill out the following form to arrange for cooled semen kits to be sent to the address below. (This is where Vader will be collected. It saves on shipping to send directly to the address below):

Dickendall Labradors
467 County Road 131
Gainesville, TX 76240

Under special instructions comment box type: **1 or 2 kits for Tracy Wight.**

The approximate cost of 1 collection kit including shipping is \$91. The approximate cost of 2 collection kits including shipping is \$164. After the collection occurs, the semen will be sent to you via Fed Ex. I will need your Fed Ex account number. To create your FREE FedEx account to facilitate shipping, <https://www.fedex.com/en-us/home.html>.

If I am out of town and you would like to have Vader collected, the bitch owner will be responsible for all travel expenses of the stud owner, as well as veterinary expenses and shipping. The bitch owner agrees to provide a credit card number to the collecting veterinarian to cover any costs.

C. Frozen. Frozen semen may be obtained at:

Josey Ranch Pet Hospital
2540 N Josey Ln #132, Carrollton, TX 75006
972-446-0667
<https://www.joseyranchpethospital.com/>

The stud fee is \$2,000 OR the pick of the litter, at the stud owner's option. A non-refundable payment of 100% of the fee must be received by the stud owner prior to the release of semen from the bank. The bitch owner assumes all risk of any kind at the time the semen leaves the bank. All costs of shipping and handling will be paid directly to the semen bank by the bitch owner. All AI veterinary expenses are the responsibility of the bitch owner. Though Artificial Insemination using frozen semen is usually very successful, we are unable to offer a guarantee on the number of puppies produced.

5. The bitch owner agrees that no puppy produced as a result of this breeding will be sold to a pet shop, agent or broker.
6. The stud owner is not obligated to sign an application for litter registration with the AKC, nor may such application be made, unless and until all applicable terms of this agreement have been complied with in full.
7. If the bitch's owner(s) fail to fulfill the conditions of this agreement, the bitch's owner(s) will be responsible for all reasonable attorney's fees, costs and/or expenses incurred by the stud owner to ensure compliance with the agreement.
